Box No. VIII Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

see separate sheet

Re Item V:

Reference is made to the following documents:

D1: US-A1-2004/0001782

D2: WO-A-01/74476

1. The subject-matter of claim 1 differs from D1/D2 mainly in that the precious metal component exhibits a continuously varying concentration profile in three abutting regions as defined in the claim.
The subject-matter of claim 1 is thus new (Article 33(2) PCT).
- 2.1 The problem to be solved by the present invention appears to be to provide a catalyst with an improved resistance to aging (table on page 12).
- 2.2 D1 and D2 do not address such a problem, nor do they give a hint to the claimed solution.
- 2.3 The subject-matter of claim 1 involves an inventive step (Article 33(3) PCT).
3. Claim 11-13 relate to methods for making the catalyst of claim 1 and as such are also novel and inventive.

Re Item VIII:

1. By the deletion of "of the respective precious metal" in claim 1 it is no longer unambiguously clear that the "concentration" relates to the concentration of precious metal. However the claim has been interpreted in this way.
2. Although claims 11, 12 and 13 have been drafted as separate independent claims, they appear to relate effectively to the same subject-matter and to differ from each other only with regard to the definition of the subject-matter for which protection is sought and/or in respect of the terminology used for the features of that subject-matter. The aforementioned claims therefore lack conciseness and as such do not meet the requirements of Article 6 PCT.
